

ANTERIOR HIP REPLACEMENT RIGHT HERE

Less Invasive, Faster Recovery.

Hip replacement can get you back in the game you love. Anterior hip replacement can get you there faster, easier and with less pain. Anterior approach requires highly specialized equipment and a highly skilled surgeon ... and they're now both available in Holland ... at the Bone & Joint Center. How successful is anterior hip replacement? Ask patient Joseph Sissell. ***"The surgery was excellent; I walked 200 ft. that evening from my room. I even went shopping the next day. Hardly any pain. I'm 65 and very active, love hunting, a lot of walking, which I'm doing just fine now. I tell everyone who will listen, go see Dr. Johnson!"***

Derick Johnson, DO, is the only surgeon in West Michigan — and one of the few in the Midwest — to offer less-invasive anterior hip replacement. Orthopedic surgeon Carl Wierks, MD, is a physician for the US Ski and Snowboarding Teams.

Find out if you're a candidate for anterior hip replacement, or the many other Olympic quality orthopedic care and sports medicine services at the Bone & Joint Center. **Call today for your consultation.**
